

A 4x4 grid structure with a dot at the top-left corner. The grid is composed of 4 columns and 4 rows. The rightmost vertical line and the bottommost horizontal line are significantly thicker than the other grid lines. A solid black circle is positioned at the top-left corner of the grid, centered on the intersection of the first vertical line and the first horizontal line.

A 4x4 grid structure with a thick top and right border. A solid black dot is located at the intersection of the bottom-most horizontal line and the left-most vertical line.
